Diving into IAS 19/ (Revised)

By R. Toraub & R. Li

Date: 03 November 2016
Venue: Conference Hall A, BPML CyberTower1, Ebene
4 CPD Points
Time: 13.30 pm – 18.30 pm

Overview of workshop

IAS19R (which replaces IAS19 for reporting periods starting on or after 1 Jan 2013) is the IFRS accounting standard that reports on employee benefits. The diversity of employee benefits means that it is important to apply the correct accounting treatment for each type of benefit. Invariably, this requires an in depth understanding of IAS19.

The aim of this half-day workshop is two-fold: on the one hand, we will dissect IAS19 into its building blocks and go through the computation of each of the components. On the other, we will bring together the different components and show how they are connected and consolidated in the accounts.

Course objective

At the end of this workshop, participants should be able to

• Understand the types of employee benefits to be reported under IAS19

• Understand the process of how actuarial assumptions are set

• Explain how the different components of an IAS19 disclosure interact with each other

• Reconcile IAS19 figures between reporting periods

Programme detail

Time	Programme	Facilitator
1330 – 1400	Registration	
1400 – 1430	Benefits to be valued under IAS19	R. Toraub
